

Human Activation Platform™

~

Synergistically
Integrated
Platform
for
Activating
Life, Work
and Business
Organization

Invented by the Core Team at
BRAIN TRAINING PRO™

WHO WE ARE

We live from the idea of making a difference in life and in the field of business by developing practical systems on the Human Activation Platform™.

Our members come from all walks of life with a diverse range of expertise and specialization including finance, social media, sales, marketing, event planning, product development, entrepreneurship, martial arts, education, payment solutions and many others.

We are thinkers and system tinkerers. We are drivers and providers. We are builders and designers. We are guides and advisors. We are activators and integrators. We are coaches and consultants. We are creators and generators. We are orchestrators and connectors. We are healers and teachers.

We have a passion for leaving each and every place and space in a better condition than we found it.

OUR PURPOSE / RAISON D'ÊTRE

As a Synergistic Leadership Initiative our Purpose is to align 5000 extraordinary individuals on a common Vision to build full spectrum individuals, teams, organizations and entities to positively impact more than 2% of the global population by the year 2045.

OUR MISSION

The first mission is activating, training and developing individuals to work exceptionally well with others to produce exponentially greater results than could ever be accomplished by working as an individual.

WHAT WE DO

We teach systems that synchronize with your brain, body and way of being with the intent of building a harmonious organization at the level of individual or group. Inside of this process we access your vision while advancing the goals that are most relevant to you and your success.

HAP™: OUR PLATFORM

The **H**uman **A**ctivation **P**latform™ synchronizes with you and how your brain, body and way of being operates in physical reality.

The its foundation **HAP**™ is built on the science of brain waves, the gamma-motor-neuron system of the body and the declarative power of language as distinguished in the field of ontology (study of the nature of being) looked at from the phenomenological perspective. The platform aims to give individuals the unique opportunity to upgrade their personal memory architecture and, in the process, create Peace of Mind in each and every situation in life, work and business.

OUR VISION

Every human being has a place to live, grow, contribute, and make a difference in our integrated global culture. This culture creates a world where no one is left out. This world creates a synergy that acts as a platform for this world to work for each and every human being, thus building a better world.

In this world,

- All human beings are related and belong to each other
- Our thoughts, intentions and actions impact every other human being
- Everyone creates and lives a life of their choosing
- Each and every human being finds their own way and place in this civilization
- Everyone learns, grows, develops, and contributes continuously
- We live a life that matters, making a powerful, positive difference
- We create and provide that which is wanted and needed
- Each and every human being can experience satisfaction, integrity and fulfillment in their life and work from choice
- There is already everything present in this world for each and every human being – with nothing missing

OUR VISION (continued)

- There is an excess of functional connections and effective distribution channels present, such that all of the basic needs of every human being are met and fulfilled
- Everyone is heard and understood

Each and every day, we discover, cause, live, and grow inside of the values and practices that make up this world. As we live our daily lives and share this perspective, we grow beyond the limitations of size, structure, form, history and past.

Thus, this world is actualized through this process. Through our work, the highest dreams and aspirations of humanity are fulfilled. This world is born anew and grows each new day as we live in it.

OUR CORE VALUES

The core values of an organization are at the source of each and every thought, communication and action that is taken or not taken.

Core values drive each and every selection in an organization. Selections can be either a decision or a choice.

A decision is a selection made based on specific considerations, which cuts off alternatives. Decisions are required for decisive action. A choice is a selection made after consideration, which opens space for new ways of being and doing things. Choice is required for living beyond the options that are given to us.

Seamlessly embodying core values within an organization creates team alignment and cultural harmony.

An organization that embodies and operates from core values is an organization that is On Purpose.

We live from and embody the Core Values of **CREATION**, **AWARENESS**, **HUMILITY**, **CHOICE**, **FUN** and **POWER**.

OUR ORGANIZATIONAL INTENT

It is our organizational intent to be massively adaptable, graciously confident and masterfully synchronized such that we can build harmonious organizations that make a profound impact and difference in our lives, the lives of others and in our world as a whole and complete system.

OUR BUSINESS

Our Business is to source the field of business itself and do what it takes to deliver upon the promise of the field of business: namely, provide what is needed, wanted and requested to those who need, want and require it at the right time, location and price-point for the benefit of all inside of organizational structure, integrity and order.
